

**M. Prakash Academy**

**Weekly Workout**

**Dear Students,**

This week there are two sets of problems. Download both and solve those. One set comes from NCERT textbook.

(2) There seems to be some confusion about submitting weekly workout. As most of you were instructed in your class, you need to maintain a separate file for these problems. Solve each problem carefully and write complete solution in the file.

(3) You are required to bring the file to the first session of tenth standard and show it to the respective teacher.

(4) A news of *partial relief* - We are **not conducting a common test** based on weekly workout of Science but **each teacher would conduct a class test based on these as soon as he/she can**, possibly before the end of June 2015.

(5) **The following instruction is ONLY for students of Kishore Sir's batch.**

This includes **Kothrud Afternoon, Dnyanada Evening, Aundh** and **students of Tilak Road who have joined Raj Sir's Dnyanada Batch for maths:**

I will conduct **three consecutive classes in the week of 8 to 13 June**. The exact dates and times will be conveyed later. One will be afternoon at Kothrud and one will be evening at Dnyanada. Students of Kothrud and Dnyanada will attend their own batches and students of Aundh and Tilak Road will have to choose one. I will upload a google planner soon to get your choices.

**- Kishore Darak.**
